**THE FIRST SHOE  
PRINTER ON THE MARKET**

# MINIBABY SHOES

This is the first sneaker printer on the market. This machine allows the direct printing of objects on the shoes without any treatment, with great durability and a very low cost.

With the Minibaby Shoes it is possible to personalise all types of footwear with highly adherent and flexible inks, overcoming unevenness thanks to the exclusive HS technology of Imprimo.

## CHARACTERISTICS

-  CCP System and HS Technology
-  3-5 minutes of printing time
-  RIP Imprimo

-  8cm thickness
-  1400x1200 dpi
-  45x50cm

The Minibaby Shoes stands out from other printers thanks to its real-time CCP (Camera Position Control) system, which allows you to see the location of the image and the print at all times in real time. At the same time, it also comes with HS Technology that allows printing on unevenness of up to 2cm, two exclusive Imprimo technologies that revolutionise the personalisation of shoes.

## HOLDER

The new design of our printer includes increased height and a new shoe mount that potentially improves printing accuracy and results.
