**COMPACT CUTTING
TABLE FOR A MINI FORMAT**

MINICUTTER 8060

This is an 80x60cm cutting table capable of cutting a wide range of materials such as corrugated cardboard, polypropylene, vinyl, cardboard, foamed PVC or foam among others.

This machine has a conveyor, CCD camera and automatic feeder integrated in one piece for greater stability and productivity.

CHARACTERISTICS

The Imprimo Minicutter has 4 tools for simultaneous cutting of material up to 10cm high and is equipped with a high definition CCD camera for automatic and accurate positioning of printed materials.

SPECIFICATIONS

Cutting área	80x60cm
Cutting thickness	10mm
Cutting speed	300-1200 mm/s
Pump power	2,2KW
Fixed power	4KW
Operation properties	Work with any CAD software
Tools	4 (oscillating, semicutting, circular and creasing wheel)
Feeding mode	Auto feeder
Fixed method	Vacuum suction
Precision	<0,01mm
Interface	Ethernet port
Files format	HPGL compatible format
Control panel	Touch screen
Driving system	Servomotor
Voltage power	AC 220V/380V +-10% 50HZ
Working environment	Temperature 0°-35° Humidity: 35%-80%
Oversall size	2600x1400x1200
