**AN ALL-ROUNDER
PRINTER**

SUPERBABY

This is a printer that cannot resist any material or object. It allows you to print on any surface with a high degree of adhesion and at a very low cost.

The Superbaby can be considered as a digital screen printer with which you can print anything you can imagine for both rigid and flexible materials, making it an all-rounder printer.

CHARACTERISTICS

-  HS Technology and CCP System optionals
-  Automatic material detection
-  RIP Imprimoprint

-  10cm material thickness
-  1900x1200 dpi
-  70x100cm

A printing area of 70x100cm and a height of 10cm are the figures that endorse this versatile printer that adapts to any material.

It also has the option of incorporating HS Technology and the CCP System with which you can print unevenness up to 2cm and position the objects to be printed on the material respectively.
